INDEX TO VOL. IV.

Page

Memoir of D. F. Gregory, M. A. Fellow of Trinity College. By the Editor 145

PLANE GEOMETRY.

Symmetrical investigation of points of inflection. *By W. Walton* 13
Demonstration of Pascal's Theorem. *By A. Cayley* . 18
Of asymptotes to algebraical curves. *By D. F. Gregory* . 42
Notes on conic sections 99
On the theory of algebraical curves. *By A. Cayley* . . 102
Polar equations to tangents to a conic section . . 112
On Brianchon's Hexagon. *By W. Walton* . . . 163
Note on geometrical discontinuity . . . 190
Proof of the property of the parabola . . . 192
On Brianchon's Hexagon. *By P. Frost* . . 277

SOLID GEOMETRY.

Proof of a property of the tangent plane to any surface . 47
Demonstration of Dupin's Theorem . . . 62
On the partial differential equations to a family of envelops. *By W. Walton* 152
Reduction of the general equation of surfaces of the second order. *By W. Thomson* 227
On the lines of curvature of surfaces of the second order. *By W. Thomson* 279

General
Dept. of Math.
89472

ALGEBRA.

Page

Method of finding the greatest common measure of two polynomials. *By A. Q. C. Craufurd* 9

On the successive approximations of a continued fraction . 97

Chapters in the analytical geometry of (n) dimensions. *By A. Cayley* 119

Notes on linear transformations. *By G. Boole* . . 167

On the theory of linear transformations. *By A. Cayley* . 193

Expressions for the sine and cosine of multiple arcs. *By R. Moon* 250

DIFFERENTIAL AND INTEGRAL CALCULI, ETC.

On certain definite multiple integrals. *By R. L. Ellis* . 1

On the transformation of multiple integrals. *By G. Boole* . 20

Problem, to find the value of a certain function . 48

On the equation $(D + a)^n y = X$, and addendum . . 60–96

Note on a definite multiple integral. *By R. L. Ellis* . 64

On the inverse calculus of definite integrals. *By G. Boole* . 82

On a new species of equations of differences . . 87

On a multiple definite integral. *By R. L. Ellis* . . 116

On a certain definite integral 143

Applications of the symbolical form of Maclaurin's Theorem . 176

On the use of the symbol $e^{\theta\sqrt{(-1)}}$ in certain transformations . 177

Solution of equations in finite differences. *By R. L. Ellis* . 182

On the theory of developments. Part I. *By G. Boole* . 214

On certain integral transformations. *By B. Bronwin* . 233

On certain continued fractions. *By P. Frost* . . 237

On the integrating factor of the homogeneous differential equation of the first order. *By G. G. Stokes* . . 241

On indeterminate maxima and minima. *By W. Walton* . 253

On inverse elliptic functions. *By A. Cayley* . . 257

MECHANICS, ETC.

On the equations of motion of rotation. *By A. Bell* . . 7

On the motion of a piston and of the air in a cylinder. *By G. G. Stokes* 28

On the motion of the centre of gravity of a broken body. *By W. Walton* 77

On the axis of spontaneous rotation 158

Note on the spontaneous axis of rotation . . . 173

On the law of gravity at the surface of a revolving homogeneous fluid 191

ASTRONOMY.

Page
On the lunar theory 49
On a problem in precession and nutation . . . 137
On a problem in central forces 171
Transformation of the differential equations of a planet's motion. *By B. Bronwin* 245

LIGHT, HEAT, ETC.

On the equations of the motion of heat referred to curvilinear coordinates 33
On some points in the theory of heat 67
On the intensity of light in the shadow of a very small circular disk 72
Notes on Magnetism. Parts I. II. *By R. L. Ellis* . 90, 139
Demonstration of a proposition in physical optics . . 115
Note on orthogonal isothermal surfaces . . . 179
Demonstration of a fundamental proposition in electricity. *By W. Thomson* 223
Note on a problem in plane optics. *By L. Fischer* . 286

MISCELLANEOUS.

On a question in the theory of probabilities. *By R. L. Ellis* 127
On the balance of the chronometer. *By R. L. Ellis* . . 133
On magic squares. *By R. Moon* 209
